Immersive unveiling of the Wajer 77 in Saint-Tropez

Newly launched model welcomed to the family by Wajer fleet in the South of France

Saint-Tropez, August 3, 2021 – After the preview in April, the time had finally come this past weekend for the Wajer 77 to make its debut at sea. Wajer Yachts has held one of the most spectacular launch events in recent memory to unveil the first Wajer 77 in the crystal blue Mediterranean waters of the Côte d'Azur. The largest model yet from the Dutch yacht builder was welcomed by a fleet of more than forty other Wajers and their owners. After the spectacular unveiling moment in the middle of the sea, the fleet continued on the "Route 77" to the famous beaches of Pampelonne where owners were invited to raise their glasses in honor of the successful launch with more than 17 orders. The first 77's have been sold in the South of France, the Balearic Islands and America.

*Dries Wajer, owner of Wajer Yachts: "*Welcoming the Wajer 77 at sea along with the entire Wajer fleet here in the South of France exceeded all my expectations and shows how strong our community is. It was an unforgettable day. Wajer owners have gathered from all over the world for this moment. The first reactions are super positive, and I am very proud of the success of this yacht. I can't wait to show her to the rest of the world!"

Wajer 77: Design, innovation and comfort
A clean design, with sleek lines and a luxurious yet sporty appearance defines the newest Wajer. Boasting a super yacht level finish and the signature Wajer innovations for ultimate comfort, like deck cooling, a patented hybrid fender system, an automatic roof and an electrically adjustable deck layout.

Thanks to the use of innovative isolation materials, the use of soft mounts for all equipment and a smart hovering interior built for the lowest sound levels, the 77 is the most silent in its class. Inside, comfort is kept at top level with a standing height of 2,15-2,35 meters and air conditioning in every room. With room to sleep 9 people, the largest Wajer yet provides ultimate comfort during multi-day trips.

About Wajer
Wajer is a family-owned business established in the Netherlands. We build powerful and luxury day-boats of up to 77ft. Our yachts are characterized by a combination of performance, comfort and contemporary design. We continuously pioneer ground-breaking innovations in pursuit of the perfect sailing experience, and our boats are completely handmade and equipped with the most advanced technology out there. As a family-owned business, we build all of our yachts from start to finish in the Netherlands with meticulous attention to detail. After our yachts set sail, we offer a service that goes above and beyond with our Wajer Care program.

Wajer can be found cruising the seven seas and many more lakes and canals around the world. We have service centers in the Netherlands, France, Spain and the USA. The current fleet consists of the Wajer 37, 38, 38 S, 38 L and the Wajer 55, 55 S, 55 HT and 77.
